Clinical Pathophysiology Syllabus

Department **Pathophysiology and General Pathology**

Curriculum s310501-ЛечДелоИИ-24-4.plx
Specialty 31.05.01 General Medicine

Qualification **General Practitioner**

Form of education **Full-time**

Total (in credits) **2**

Total academic hours **72**

including:

Practical classes **48**

Self-study **24**

Control:

Credit, 7st term

Course outline in terms

Academic year (Term)	7 (4.1)		Total	
Weeks	17			
Types of classes	Cur	Syl	Cur	Syl
Lectures	16	16	16	16
Practical classes	32	32	32	32
Contact	48	48	48	48
Self-study	24	24	24	24
Total	72	72	72	72

The Syllabus is compiled by:

PhD in Biological Sciences (Biology), Senior Lecturer, Kavushevskaya N.S

The Syllabus

Clinical Pathophysiology

Developed in accordance with Federal State Educational Standard:

Federal State Educational Standard of higher education in the specialty 31.05.01 General medicine (Order of the Ministry of Education and Science of the Russian Federation on 12.08. 2020 № 988

Based on the Curriculum:

31.05.01 GENERAL MEDICINE

Specialization: General Medicine

Approved by the Academic Council of Surgut State University, 13.06.2024 Record № 5.

The Syllabus was approved by the Department

Pathophysiology and General Pathology

Head of Department, Doctor of Medicine, Professor Kovalenko L.V.

1. COURSE OBJECTIVES	
1.1	The aim Study of general patterns and specific pathophysiological mechanisms of occurrence, clinical development and outcomes of pathological processes, conditions, individual diseases and to develop practical skills for assessing morphofunctional, physiological conditions and pathological processes in the human body, the principles of their identification, pathogenetic treatment and prevention.

2. COURSE OVERVIEW	
Course code (in curriculum)	E1.O.04.01
2.1	Assumed background:
2.1.1	Anatomy
2.1.2	Chemistry
2.1.3	Biology
2.1.4	Microbiology, virology
2.1.5	Normal physiology
2.1.6	Biochemistry
2.2	Post-requisite courses and practice:
2.2.1	Obstetrics and gynecology
2.2.2	Faculty surgery, urology
2.2.3	Hospital therapy, endocrinology
2.2.4	Traumatology, orthopedics
2.2.5	Hospital surgery, pediatric surgery
2.2.6	Oncology, radiation therapy
2.2.7	Faculty therapy, occupational diseases

3. COMPETENCES UPON COMPLETION OF THE COURSE (MODULE)	
GPC-5.6. Demonstrates knowledge and skills to identify: the structure of the human body, morphological macro- and microscopic parameters in pathology; diagnose criteria of general pathological pathophysiological processes in various nosologies; on the basis of which he/she possesses skills in topographic anatomy and is able to solve questions of operative surgery;	
GPC-5.8 Demonstrates understanding of mechanisms of development of general pathological processes, knowledge of issues of pathogenesis of various human diseases and pathological conditions, ability to identify the leading links of pathogenesis in their relationship in a particular disease or pathological condition and on this basis the ability to justify effective pharmacotherapy;	
GPC-5.9 Demonstrates knowledge of the theoretical foundations of immunology and allergology, understanding of immune defense mechanisms, types of immunological reactions and their role in the pathogenesis of human disease;	
GPC-5.10. Demonstrates knowledge of the etiology and pathogenesis of diseases, which is necessary to assess physiological state and pathological processes in order to diagnose treatment and prevention of diseases.	
PC-9.1 Analyzes medical information	
PC-9.2 Presents medical information based on evidence-based medicine	
PC-10.1 Participates in the introduction of new methods and techniques aimed at protecting the health of citizens	

By the end of the course students must:

3.1	Know:
3.1.1	the specifics of the subject and objectives of the discipline pathophysiology, clinical pathophysiology;
3.1.2	about the role, place and connection with other sciences in the system of biological and medical disciplines;
3.1.3	the main historical stages in the development of pathophysiology, clinical pathophysiology;
3.1.4	about the prospects for the development of science and new directions in the study of pathophysiology, clinical pathophysiology;

3.1.5	basic concepts used in pathophysiology, clinical pathophysiology;
3.1.6	general patterns of development and manifestation of various pathological reactions, processes, conditions and individual diseases;
3.1.7	mechanisms of formation of pathological systems and disturbances of the information process when the body is exposed to various pathological agents;
3.1.8	patterns of development of basic pathological conditions, symptoms, syndromes, diseases, as well as mechanisms of recovery of various diseases;
3.1.9	mechanisms of formation of pathological systems and disturbances of the information process when the body is exposed to various pathological agents.
3.2	Be able to:
3.2.1	use acquired knowledge in pathophysiology, clinical pathophysiology when studying other biomedical and clinical disciplines;
3.2.2	correctly interpret and apply the basic concepts of pathophysiology, clinical pathophysiology when studying biomedical and medical literature and when working together with medical specialists;
3.2.3	analyze pathological processes and individual diseases at various structural and morphofunctional levels;
3.2.4	conduct clinical and pathogenetic parallels of leading pathological syndromes;
3.2.5	conduct a pathophysiological analysis of clinical, laboratory, experimental and other data and formulate on their basis a conclusion about the possible causes and mechanisms of development of pathological processes (diseases);
3.2.6	carry out differential diagnosis between pathological conditions based on drawing up pathogenesis diagrams;
3.2.7	justify the pathogenetic approach to the treatment of the pathological process (disease);
3.2.8	analyze the role of causes, conditions, reactivity of the body in the occurrence, development and completion (outcome) of diseases;
3.2.9	analyze the etiology, pathogenesis, manifestations and outcomes of the most common forms of pathology of organs and physiological systems, the principles of their etiological and pathogenetic therapy.

4. STRUCTURE AND CONTENTS OF THE COURSE (MODULE)

Class Code	Topics /Class type	Term / Academic year	Academic hours	Competences	Literature	Notes
1.1	Systemic inflammatory response syndrome. Sepsis. /Lec/	7	2	GPC-5.6 GPC-5.8 GPC-5.9 GPC-5.10 PC-9.1 PC-9.2 PC-10.1	L1.1 L1.2 L1.3L2.1 L2.2 L2.3L3.1 L3.2 E1 E2
