The Syllabus is compiled by:

PhD in Medical Sciences, Associate Professor, Rybalka O.O. _____

The Syllabus

Internal Diseases Propaedeutics

Developed in accordance with Federal State Educational Standard:

Federal State Educational Standard of higher education in the specialty 31.05.01 General medicine (Order of the Ministry of Education and Science of the Russian Federation on August 12, 2020 No. 988)

Based on the Curriculum:

31.05.01 GENERAL MEDICINE

Specialization: General Medicine

Approved by the Academic Council of Surgut State University, “ June 15, 2023, Record No. 5

The Syllabus was approved by the department

Internal diseases

Head of Department, Doctor of Medicine, Professor Ariamkina O.L.

Chairman of Academic and Scientific Council, PhD in Medical Sciences (Medicine), Senior Lecturer Lopatskaya Zh.N.

1. COURSE OBJECTIVES	
The aim of the course of Internal Diseases Propaedeutics is to study clinical research methods: survey, examination, palpation, percussion, auscultation of the patient; to study additional research methods (laboratory and instrumental), with subsequent interpretation of the obtained data; to master the skills of analyzing and synthesizing patient complaints, their anamnesis data, examination results, laboratory, instrumental, pathoanatomic and other studies in order to recognize the condition or establish the presence or absence of the disease and determine the patient's main pathological conditions, symptoms, disease syndromes, nosological forms in accordance with the International Statistical Classification of Diseases and Health-related Problems, XI revision.	

2. COURSE OVERVIEW	
Course Code (in curriculum)	B1.O.04
2.1 Assumed background:	
2.1.1	Introduction to Speciality. Ethics and Deontology (Bioethics)
2.1.2	Professional Image
2.2 Post-requisite courses and practice:	
2.1.1	Pathologic Syndromes in Clinical Medicine
2.1.2	Faculty Therapy
2.1.3	Infectious Diseases
2.1.4	Outpatient Therapy
2.1.5	Obstetrics
2.1.6	Phthisiatry
2.1.7	Professional Practice, Physician Assistant
2.1.8	Hospital Therapy (5th year of education)
2.1.9	Hospital Therapy (6 th year of education)
3. COMPETENCES UPON COMPLETION OF THE COURSE (MODULE)	
PC-1.1: Demonstrates knowledge in etiology, pathogenesis, diagnostic criteria (clinical - subjective, physical, laboratory, instrumental, identifies the patient's common pathological conditions, symptoms, disease syndromes and diagnoses nosological forms according to the International Statistical Classification of Diseases and Related Health Problems, X - XI revisions	
PC-1.2: Carries out diagnostics, evaluates the prognosis (short-, medium- and long-term course) of the disease, identifies acute complications and complications of chronic diseases	
PC-2.1: Assesses the condition of a patient requiring emergency or urgent medical care, E950, including a state of clinical death	
PC-3.1: Examines the patient (handle the patient's complaints, anamnesis, physical data based on the examination results, determines the necessary examination plan, evaluates the parameters of laboratory, instrumental, pathological and anatomical and other methods in order to diagnose diseases, assesses the prognosis (short-, medium- , long-term) of its course and outcomes	
PC-3.2: Makes an initial and clinical diagnosis in accordance with the International Statistical Classification of Diseases and Health Problems X - XI revisions and current clinical classifications	
PC-8.2: Keeps medical records, including the electronic format	
By the end of the course students must:	
3.1	Know:
3.1.1	aetiology, pathogenesis, diagnostic criteria (clinical – subjective, physical, laboratory, instrumental);
3.1.2	methods for determining the patient's main pathological conditions, symptoms, disease syndromes ;
3.1.3	principles of diagnostics of the main nosological forms;
3.1.4	how to work in accordance with the International Statistical Classification of Diseases and Related Health Problems, X-XI revisions;
3.1.5	rules of examination of the patient (collection and analysis of patient complaints, data of his anamnesis, physical data) according to the results of the examination, appointment of the examination plan, parameters of laboratory, instrumental, pathologic-anatomical and other research methods for the diagnostics of diseases, prognosis (short -, medium -, long-term) of its course and outcomes;
3.1.6	principles of early and differential diagnostics of diseases;
3.1.7	rules for routing and managing patients on the basis of current legislation (standards, procedures for providing medical care, clinical recommendations);
3.2	Be able to:
3.2.1	determine the patient's main pathological conditions, symptoms, syndromes of diseases;
3.2.2	perform differential diagnostics, evaluate the prognosis (short -, medium - and long-term) of the course of the disease, identify acute complications and complications of chronic diseases;
3.2.3	assess the condition of a patient requiring medical care in urgent or emergency forms, to diagnose a condition that poses a threat to the patient's life, including a state of clinical death;

3.2.4	conduct an examination of the patient (collection and analysis of patient complaints, his anamnesis data, physical data), based on the results of the examination, determine the necessary examination plan, evaluate the parameters of laboratory, instrumental, pathologic-anatomical and other research methods for the diagnosis of diseases, assess the prognosis (short -, medium -, long-term) of its course and outcomes;
3.2.5	formulate a preliminary and clinical diagnosis in accordance with the International Statistical Classification of Diseases and Related Health Problems X-XI revisions and current clinical classifications;
3.2.6	carry out early and differential diagnosis of diseases;
3.2.7.	provide treatment to various categories of patients with diseases in outpatient settings, in hospitals and centres of high-tech medical care (VMP) with the use of medicines, medical devices and therapeutic nutrition, taking into account the clinical picture, in accordance with current procedures, standards of medical care, clinical recommendations (treatment protocols);
3.2.8	maintain medical records, including in electronic form;
3.3	Have skills of:
3.3.1	knowledge about the aetiology, pathogenesis, diagnostic criteria (clinical – subjective, physical, laboratory, instrumental), about the main pathological conditions, symptoms, syndromes of diseases and diagnosis of nosological forms
3.3.2	Working in accordance with the International Statistical Classification of Diseases and Related Health Problems, X-XI revisions;
3.3.3	the principles of differential diagnosis, assessment of the prognosis (short-, medium - and long-term) of the course of the disease, detection of acute complications and complications of chronic diseases;
3.3.4	examination of the patient (collects and analyses the patient's complaints, his anamnesis, physical data), according to the results of the examination, determining the necessary examination plan, evaluating the parameters of laboratory, instrumental, pathologic-anatomical and other research methods for the diagnosis of diseases, evaluating the prognoses (short -, medium -, long-term) of its course and outcomes;
3.3.5	the formulation of a preliminary and clinical diagnosis in accordance with the International Statistical Classification of Diseases and Related Health Problems X-XI revisions and current clinical classifications;
3.3.6	knowledge of early and differential diagnosis of diseases;
3.3.7	knowledge on determining the routing and management of patients on the basis of current legislation (standards, procedures for providing medical care, Clinical recommendations), on the basic principles of treating various categories of patients with diseases in outpatient settings, in hospitals and high-tech medical care centres (VMP);
3.3.8	maintaining medical records, including in electronic form;
3.3.9	determining the purpose of organizing a plan, a report on the work of medical personnel, conducting internal quality control and safety of medical activities within the scope of official duties, monitoring the performance of duties by secondary and junior medical personnel and other medical workers of their official duties, presenting the results of the analysis;

4. STRUCTURE AND CONTENTS OF THE COURSE (MODULE)

Class Code	Topic /Class type	Term/Academic	Academic hours	Competences	Literature	Interactive	Notes
	Section 1. Clinical methods of examination of patients. Methods of research in diseases of the respiratory system and cardiovascular system.	year					
1.1	The subject and tasks of Internal Diseases Propaedeutics. Methodology of diagnostics. The scheme of the medical history. Survey of patients with respiratory diseases. The main complaints in the pathology of the respiratory organs, their diagnostic significance. /Lec/	3	2	PC-1.1 PC-3.1 PC- 8.2	L1.1L1.2 L1.3	0	
1.2	Clinical methods of examination. The scheme of the medical history. General examination. Examination rules. The importance of an examination in the clinic of internal diseases. Survey of patients with respiratory diseases. Characteristics of shortness of breath, cough, chest pains. /Pr/	3	3	PC-1.1 PC-3.1 PC- 8.2	L1.1L1.2 L1.3 ∅1	0	

1.3	Examination and palpation of the chest. Percussion of the lungs. The history of the development of percussion as a research method. Physical bases of the method of comparative and topographic percussion of the lungs. General rules and techniques of percussion. /Lec/	3	2	PC-1.1 PC-3.1	L1.1L1.2 L1.3	0	
1.4	Examination of the chest. Pathological forms of the chest. Palpation of the chest. Surface orientation palpation, elasticity check, determination of vocal tremor. /Pr/	3	3	PC-1.1 PC-3.1 PC- 2.1	L1.1L1.2 L1.3	0	
1.5	The scheme of the medical history. General examination. Survey of patients with respiratory diseases. The main complaints in the pathology of the respiratory organs, their diagnostic significance. /Self-study/	3	2	PC- 3.1 PC-8.2	L1.1L1.2 L1.3	0	
1.6	Topographic percussion of the lungs. General rules and techniques of percussion. /Pr/	3	3	PC-1.1 PC-3.1	L1.1L1.2 L1.3	0
